As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

99P-0485

C 895

Dear Ms Jane Kenney,

June 3, 1999

I go along with the Center for Science on banning the use of antibiotics in animal feed.

I may need this antibiotic to save my life someday - you may too. Unless we stop adding all these additives to our foods and antibiotics to their feed to make them produce more, we are going to be in trouble.

God, the perfect builder knew what he was doing when he made cows, chickens, pig, etc.. If he wanted them bigger or produce more meat or milk, he would have done so in the beginning. He knew what he wanted, let's leave it at that.

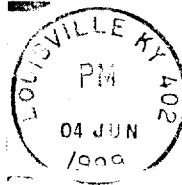

Man always messes up something already good & perfect.

Let's support the petition by CSPI.

Sincerely
Rebecca Dunn
